MediLodge post-acute care centers provide skilled nursing care and short-term rehabilitation services when you are not yet able to be independent so that you can get back to doing the things you love, with the people you love.

While a physician will supervise your care, other trained health professionals will be helping you to grow stronger:

• Registered nurses will provide wound care, give you the correct medications, and help to monitor other medical problems around the clock.
• Physical therapists will teach you how to make your muscles stronger, climb steps, and get up and sit down from a chair, toilet or bed.
• Occupational therapists will teach you the skills you need to perform everyday tasks at home.
• Speech and language therapists will evaluate and treat problems with swallowing, speaking, and understanding.

Other Benefits:
• MediLodge provides extensive, customized in-patient therapy so that you may return home stronger and safer to your loved ones.
• For your convenience, you will not need to drive anywhere for your care and therapy.
• 24-hour close monitoring and teaching by licensed staff.

Financial Benefits:
• Your short-term stay with MediLodge may be covered by Medicare and most other insurance plans.
• Your short-term stay with MediLodge may decrease your length of stay in the hospital.
• Your short-term stay with MediLodge may decrease your chances of returning to the hospital.

MediLodge has very low rehospitalization rates!

When You are Ready to Go Home:
• MediLodge discharge planners will arrange home health care services to ensure that you continue to receive needed care at home.
• Home health services may include nursing care, a home health aide, physical therapy, occupational therapy, and speech therapy.
If you experience a decline in your condition while at home, you may contact MediLodge to return for 24-hour care until you are stable enough to return home again.
